Co-tutelles in European universities: concepts, aims and implementation

EUA-CDE Thematic Peer Group Report

To promote education collaboration through teaching collaborations, innovation, enhancement activities, academic exchange between staff, and students and the development of dual, multiple or joint international degrees within the framework of the EU's academic partnerships and mobility programmes.

YERUN's Strategic Plan (2016-2020) as approved in Lisbon (February, 2016)

Joint Programmes at doctorate level
linking education and research

The need for this report

degrees of jointness

Joint doctoral programmes are the result of two or more institutions joining forces with the objective of improving the quality of education and research in the particular subject area covered.

setting up joint doctoral programmes

proposal stage

development stage

management stage

quality assurance

proposal stage

the proposal stage has several purposes, including identifying joint doctoral programme opportunities, developing a programme specification, and evaluating the viability to progress to the development stage

development stage

the development stage moves from the initial evaluation of the proposal stage into a detailed agreement where the joint doctoral programme is described and the partners' responsibilities and contractual obligations are defined

management stage

at the management stage, all aspects of the development stage should be accommodated in the governing and management structures of partner institutions

quality assurance

quality assurance is a *shared* responsibility of the institutions involved. However, a clear distinction should be made between quality assurance systems at the institutional level and quality assurance at the individual level

Concluding remarks

concluding remarks

- added value
- trust
- embrace the differences
- JOINT programme
- institutional support
- resources
- communication
- quality at all levels, in each stage
- (inter) institutional templates

Thank you!
